

REED HPC8+ Guillotine Cutter Technical Specifications

Description: Guillotine Pipe Cutter

Item Code #04609

Catalog No. HPC8+

PIPE TOOLS & VISES
SINCE 1896

Manual powered, guillotine style cutter slices smoothly through PE.

New all aluminum construction results in lighter weight and greater rigidity.

New source for REED blades means it has a made in USA blade with equal or better cutting versus prior blade.

Cast aluminum upper yoke assembly and crosshead of #04609 are not interchangeable with the HPC8 #04608 ductile iron parts, but all other parts are the same. REED will maintain an inventory of replacement ductile iron parts for the old style #04608 cutter.

Tool Specifications:

- Weight: 27.4 lbs
- Pipe Capacity: 3.5 O.D. minimum, 9.06 O.D. maximum (90 – 230 mm O.D.)
- Pipe Range: 3" IPS – 8" DIPS for SDR15.5 - SDR9
- Size Closed: 29.62 in x 6 in x 18.28 in
- Height Fully Open: 39.63 in

Features:

- 22%+ weight **reduction** with aluminum castings
- Greater capacity, up to 9.06" O.D. Slightly enlarged pipe capacity fits true 8" DIPS and IPS for PE
- Aluminum rails and crosshead have a hard anodize finish to reduce wear on sliding surfaces
- Superior cuts with MADE IN USA blade
